## Decision Dashboard

Our Decision Dashboard is your source for weather, climate, drought and cropping data in the North Central Region. Featuring our U2U**DST** Suite and a variety of tools from our regional partners, our dashboard is a one-stop decision resource for ag advisors, producers and decision makers.

NEW!
AgClimate View**DST**

This tool provides easy to use historical climate and crop yield data for the Corn Belt.

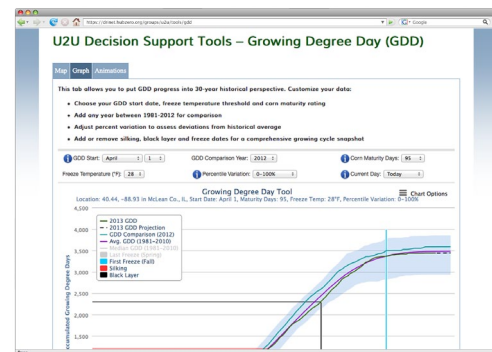

Put growing cycles
into historical context:

- Plot local temperature and precipitation variation back to 1980
- Track county crop yields and trends
- Consider crop yields in the context of temperature, precipitation and growing degree day (GDD) data

http://ACV.AgClimate4U.org

NEW!
Corn GDD**DST**

Track real-time GDD accumulations and learn about climate risks for corn development.

Projections and historical data
can help you make decisions about:

- Climate Risks – Identify the likelihood of early and late frosts/freezes
- Activity Planning – Consider corn hybrid physiological maturity estimates, along with GDD projections when making seed purchases and other growing season decisions
- Marketing – Look at historical and projected GDD for forward pricing and crop insurance decisions
